# The Electro-Acuscope and Myopulse

## How do these units work?

---

When tissues are diseased or damaged, the normal electrical flow and functioning of the body is disrupted at the cellular level. The cells experience "their power being shut off." Nutrients are unable to flow into the cells and toxins are unable to be released. This results in increased electrical resistance in the problem area, causing the body's electrical currents to flow around the damaged tissue. The Electro-Acuscope has the capacity to drive the current through the resistance and stimulate rapid cellular regeneration.

These are state-of-the-art computerized medical instruments. Both units are FDA approved. They are programmed to "read" tissue at a cellular level and compare those readings to optimal or healthy tissue. The computer then selects the appropriate corrective signal and delivers it to the damaged tissue. The units continue to read and treat until the tissue electrical flow is normalized.

The Electro-Acuscope is designed to specifically enhance healing of neurologic tissues and read all body tissues and systems as well. The Electro-Myopulse specializes in enhancing healing of connective tissues such as bone, muscle, tendon and ligament.

These units are bringing phenomenal results in applications as diverse as sports injuries, auto accidents, repetitive motion injuries (carpal tunnel), arthritis, stress reduction and insomnia.

Treatments with these amazing units include:

- Alzheimer's Disease
- Arthritis/Bursitis
- Carpal Tunnel
- Headaches
- Auto Accidents/Trauma
- Back Injury
- Beauty Care
- Detoxification
- Fibromyalgia
- Herpes Simplex/Shingles
- Infertility/Impotence
- Insomnia
- Sciatica
- Sports Injuries
- Stress Reduction

- TMJ
- Veterinary Medicine  
...and much more
